Hey, you did the first step, not being afraid to speak up, although all of us are hidden, still it takes courage to speak the struggle you (and many people) face. So cheers for that major milestone, hopefully in sometime you will look back at this one day of your first forum, and then will appreciate such a move, as of now it is hard probably for you, as for many of us, but keep on posting posts, I envy you with such courage to speak up, looking forward to chat back when you are next on. I am for real speaking of how much gratitude a lot of people have shared, here has many people understanding you, like seriously getting you, although yet each person feels that he is the only one with the issue but in reality it isn't true, and is totally fine and encouraged to speak up with others here to try and achieve their goals properly. Hatzlacha Raba my friend, keep at it! I sincerely encourage you continue with gye since it may work for you, some Rebbeim may not get that. I hope to cheer with you on your couple days and weeks, then months!! You got this!
