

Restarting

Posted by bebetter85 - 26 Aug 2021 13:38

I just lost a 54 day streak. I didn't post much during my last journey and I didn't even create a thread. I mostly chatted with a few guys on the chat. Will try to post more regularly during this next journey.

Warning: Spoiler!

I had a really hard week , was trying to make arrangements for something and was busy with it all week - I had to be in touch with quite a lot of ppl (some of whom were very hard to get hold of). Then finally last night after all the arrangements were in place, one guy backed out and that was it.

Sounds disappointing.

How do you "lose" a streak? Where did it go?
